

# JBIS

## Journal of the British Interplanetary Society

VOLUME 55

2002

<i>Issue No:</i>	<i>Themes</i>
1/2	<b>Interstellar Colonization Soviet/CIS Space Activities Technologies for Space Tourism</b>
3/4	<b>Mars Investigations Solar System Monitoring Interstellar Studies</b>
5/6	<b>The Popular Commercialisation of Space Imaging Satellites</b>
7/8	<b>Chinese Space Programme Soviet Rocket Technology Interstellar Intelligence</b>
9/10	<b>Solar System Science Soviet Cosmonaut Missions</b>
11/12	<b>Radio Agriculture Space Tourism Interstellar Studies Space Weather History of Rocketry</b>

\* \* \*

## AUTHOR INDEX

Barclay R. <i>et al</i>	In Situ Preservation of Historic Spacecraft	173
Clark P.S.	Chinese Satellites: Status Report at the End of 2001	218
Clark P.S.	Final Equator Crossings and Landing Sites of CIS Satellites	21
Clark P.S.	Israel's Ofeq 3 and the EROS Satellites	193
Clark P.S.	Launch and Recovery Times of Russian Photoreconnaissance Satellites	202
Clark P.S.	Orbital Manoeuvres of China's Zi Yuan Satellites	236
Clark P.S.	The Feng Boa-1 Launch Vehicle Programme	226
Cockell C.S. <i>et al</i>	Interstellar Predation	8
Cockell C.S.	'Radio-Agriculture' – Ground and Space-Based Determination of Agricultural Productivity	362
Cockell, C.S.	The Trans-Mars Expedition – A Long Distance, Long Duration, Scientific EVA	291
Collins P.	Towards Space Tourism: The Challenge for British Space Policy	148
Fawkes S.	The Application of Intelligent Building Technologies to Space Hotels	68
Gardner J.N.	Assessing the Computational Potential of the Eschaton: Testing the Selfish Biocosm Hypothesis	285
Genta G. <i>et al</i>	Some Considerations on Sun Gravitational Lens Missions	131
Harris M.J.	Limits from CGRO/EGRET Data on the Use of Antimatter as a Power Source by Extraterrestrial Civilizations	383
Harrison M.H.	The Popular Commercialisation of Space: Human Factor Issues	160
Harvey B.	Project 863	222
Hendrickx B.	The Origins and Evolution of the Energiya Rocket Family	242
Hendrickx, B.	The Kamanin Diaries 1969-1971	312
Kuznetsov V.D. <i>et al</i>	"Polar-Ecliptic Patrol" (PEP) for Solar Studies and Monitoring of Space Weather	398
Maccone C. <i>et al</i>	The "Trojan" Asteroids as Bases to Monitor Other Asteroids Potentially Dangerous for Earth	109
McInnes C.R.	Minimum Mass Solar Shield for Terrestrial Climate Control	307
McInnes C.R.	Non-Keplerian Orbits for Mars Solar Reflectors	74
McInnes C.R.	The Light Cage Limit to Interstellar Expansion	279
Ness P.K. <i>et al</i>	Spider-Ravine Models and Plant-like Features on Mars – Possible Geophysical and Biogeophysical Modes of Origin	85
Przybilski O.H.	The Germans and the Development of Rocket Engines in the USSR	404
Puthoff H.E. <i>et al</i>	Engineering the Zero-Point Field and Polarizable Vacuum for Interstellar Flight	137
Santoli S.	A 'Lab-on-Chip' Design for Miniature Autonomous Bio/Chemoprospecting Planetary Rovers	115
Siddiqi A.A.	The Almaz Space Station Complex: A History, 1964 – 1992, Part 2: 1976 – 1992	35
Sivier D.	Live from the Mars Hotel: Space Locations and the Film Industry	188
Taylor R.L.S.	Space Tourism – The Moon and the Popular and Commercial Exploitation of Space	366
Tolkowsky G.	Terra Incognita: Cosmological Theory and Space Colonization	2
van Pelt M.O.	Orbital Space Tourism: Affordable Ticket Prices in the Near Future?	182
Vulkov, K.	A Mechanical Principle for Acquisition of Useful Power on a Celestial Body through Utilisation of its Planetary Precession	394
Wright K.M.	Spaceflight - Reducing the Risks	165

## SUBJECT INDEX

Agriculture	362	Spacecraft preservation	173	Project 863	222
Almaz	35	USSR	21,35,202,242, 312,404	Radio-agriculture	362
Anthropic principle	285	Interstellar precursor mission	131	Reconnaissance satellites	21,202
Antimatter	383	Interstellar propulsion	137	Risk management	165
Applications satellites	193,218,236	Interstellar travel	137,279,383	Rockets	
Asteroids		Israel	193	History	404
near-Earth objects	109	Kamanin, N.P.	312	Russia/USSR	
BNSC	148	Lab-on-a-chip	115	Almaz	35
China	218,222,226,236	Launch vehicles		Early rocketry	404
Climate control	74,307	China	226	Energia launch vehicle	242
Colonisation	2,279	Reusable	182	Landing sites	21
Communications satellites	218	USSR	242,404	Manned missions	21,35,312
Correspondence	136,200,241,428	Life	8,85	Reconnaissance satellites	21,202
Cosmology	2,285	Manned spaceflight		SETI	131
Cosmos satellites	21,202	China	218	Fermi paradox	8,279
Economics	182,366	Landing sites	21	Gamma ray detection	383
Energia launch vehicle	242	Mars missions	291	Predation	8
Energy sources	137,394	Risk management	165	Probes	131
Entertainment industry	188	Tourism	68,148,160,173, 182,188,366	Solar activity	398
EROS satellite	193	USSR	35,312	Solar reflector	74
Evolution	8	Mars		Solar shield	307
Exobiology	85	Manned missions	291	Spacecraft preservation	173
Extraterrestrial intelligence		Morphology	85	Space hotels	68,366
as predators	8	Solar reflectors	74	Space stations	
Probe detection	383	Resources	291	Almaz	35
Feng Bao launch vehicle	226	Terraforming	74	Space weather	398
Fermi paradox	8,279	Microgravity	160	Technology development	222
Film industry	188	Microsatellites	222	Terraforming	
Gamma-ray astronomy	383	Military projects		Mars	74
Genetic engineering		Reconnaissance satellites	21,202	Trans-Mars expedition	291
radio-controlled germination	362	Space station	35	Tourism	68,148,160,173, 182,188,366
Global warming	307	Nanotechnology	115	Vacuum energy	137
Gravitational lens	131	Observation satellites	218,236	UK space policy	148
Greensat	193	Ofeq satellite	193	USSR see Russia/USSR	
History		Orbital mechanics	74,109,236	Zero-point energy	137
Almaz	35	Planetary exploration	115,291	Zu Yuan satellites	236
China	226	Precession engine	394		
Germany	404				

## BOOK NOTICES

Contributed by Anders Hansson, Peter D. Mata, Reginald Turnill and Dick Taylor

Clark S.	Life on Other Worlds and How to Find It	420
Dick S.J.	The Biological Universe	420
Siddiqi A.A.	Challenge to Apollo: The Soviet Union and the Space Race, 1945-1974	420
Wertz J.R.	Mission Geometry; Orbit and Constellation Design and Management	311
Vallado D.A.	Fundamentals of Astrodynamics and Applications - Second Edition	311
